Kata Pengantar

Statistik Indonesia dalam Infografis 2024 adalah publikasi tahunan BPS sebagai pelengkap dari publikasi Statistik Indonesia 2024 (SI 2024). Pada SI 2024, data disajikan dalam bentuk tabel, sedangkan pada publikasi Statistik Indonesia dalam Infografis, data disajikan secara visual dalam bentuk infografis.

Tujuan disusunnya Statistik Indonesia dalam Infografis adalah sebagai upaya meningkatkan literasi pengguna terhadap data statistik. Topik dipilih berdasarkan isu terkini atau fakta menarik dari data SI 2024. Dengan visualisasi yang menarik, diharapkan pengguna lebih mudah memahami data yang disajikan.

Kami sampaikan penghargaan dan terima kasih kepada semua pihak yang telah memberikan kontribusi. Semoga publikasi ini bermanfaat.

Jakarta, September 2024
Plt. Kepala Badan Pusat Statistik

Amalia Adininggar Widyasanti

Preface

The Statistical Yearbook of Indonesia in Infographics 2024 is an annual BPS publication as a complementary to the Statistical Yearbook of Indonesia 2024 (SI 2024). In SI 2024 the data is presented in tabular format, while the data in the Statistical Yearbook of Indonesia in Infographics is presented visually in infographic format.

The aim of preparing the Statistical Yearbook of Indonesia in Infographics is to increase user literacy regarding statistical data. Topics are chosen based on current issues or interesting facts from SI 2024 data. With attractive visualization, it is expected that users are easier to understand the data presented.

We would like to express our sincere appreciation and gratitude to all those who have contributed. Hopefully this publication will be beneficial.

turun **50,27%**
dibanding 2022
decreased 50.27% compared to 2022

Penurunan ini dipengaruhi oleh moderasi harga komoditas utama dunia terutama CPO, penurunan volume ekspor mineral, dan penyesuaian tarif bea keluar produk mineral seiring dengan kemajuan hilirisasi sumber daya alam (Kementerian Keuangan 2023)

This decline was influenced by the moderation in the prices of major world commodities, especially CPO, a decrease in the volume of mineral exports, and adjustments to export duties on mineral products in line with the progress of downstreaming of natural resources (Ministry of Finance 2023)

Produksi dan distribusi air bersih di Indonesia turut terdampak oleh pandemi COVID-19, meskipun dampaknya bervariasi di berbagai daerah.

The production and distribution of clean water in Indonesia has also been affected by the COVID-19 pandemic, although the impact varied across regions.

KONDISI AIR BERSIH di Indonesia Pascapandemi COVID-19

Clean Water Conditions in Indonesia Post COVID-19 Pandemic

Pada 2022*, perusahaan air bersih di Indonesia berpotensi memproduksi **7,96 triliun liter** air bersih dalam setahun.

In 2022, water supply establishment in Indonesia had the potential to produce 7.96 trillion liters of clean water in a year.*

Realisasi produksi air bersih tahun 2022 adalah

5,27 triliun liter

meningkat sebesar 0,28% dari produksi air bersih tahun sebelumnya.

The actual production of clean water in 2022 was 5.27 trillion liters, which was 0.28% more than the production the previous year.

Volume air yang disalurkan perusahaan air bersih di Indonesia selama 2022* adalah **4,50 triliun liter (85,39% dari total realisasi produksi air bersih).**

In 2022, the water supply establishment in Indonesia distributed a volume of 4.50 trillion liters of water, which accounted for 85.39% of the entire realised production of clean water.

Hanya **9,20%**

rumah tangga di Indonesia yang sumber air minum utamanya berasal dari air leding.

Only 9.20% of households in Indonesia had their main source of drinking water from piped water.

Volume kebocoran air bersih sebesar **0,79 triliun liter (17,55% dari total volume air bersih yang disalurkan).**

The volume of clean water leaks was 0.79 trillion liters (17.55% of the total volume of clean water distributed).

Pada 2022, Papua adalah provinsi dengan persentase **terendah** rumah tangga yang memiliki akses terhadap **sumber air minum layak**.

In 2022, Papua was the province with the lowest percentage of households having access to improved drinking water sources.

Di provinsi Papua hanya

65,39%

rumah tangga yang memiliki akses terhadap sumber air minum layak, dan **hanya 2,97% rumah tangga** yang menggunakan **air leding** sebagai sumber air minumannya.

In Papua province, only 65.39% of households had access to improved drinking water source, and only 2.97% of households used piped water as a source of drinking water.

Padahal, pada 2022* perusahaan air bersih di provinsi Papua berpotensi memproduksi **52,35 miliar liter air**. Namun yang tersalurkan hanya sekitar

1/3 -nya saja, yaitu sebesar **19,64 miliar liter air**.

In fact, in 2022 the water supply establishment in Papua province had the potential to produce 52.35 billion liters of water. However, only around one-third of it was dispersed, totalling 19.64 billion liters of water.*

- Catatan/Note:
- *Angka sementara/Preliminary figures
 - Air leding mencakup leding meteran dan leding eceran/Piped water included metered piped and retail piped tap
 - Air bersih yang disalurkan adalah seluruh volume air bersih yang disalurkan oleh perusahaan air bersih kepada pelanggan, termasuk volume air bersih yang hilang dalam penyaluran/kebocoran/Clean water distributed is the total volume of clean water distributed by water supply establishments to the customers, including water lost in distribution

LISTRIK

yang Dibangkitkan dan Didistribusikan di Indonesia Pascapandemi COVID-19

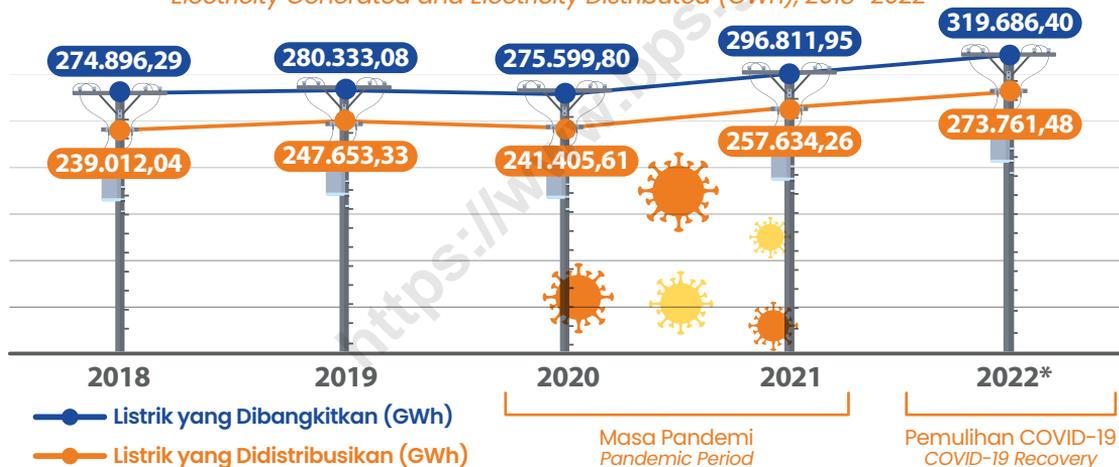

Electricity Generated and Distributed Post COVID-19 Pandemic in Indonesia

Pandemi COVID-19 mempengaruhi sektor kelistrikan di Indonesia. Pertumbuhan listrik minus pada 2020, dalam beberapa dekade terakhir secara nasional. Tetapi telah membaik di 2021, sehingga pertumbuhannya menjadi positif. Artinya, konsumsi listrik di 2021 telah pulih dan melampaui 2019 sebelum terjadinya pandemi COVID-19 (PT PLN (Persero) 2022).

The COVID-19 pandemic has affected the electricity sector in Indonesia. Electricity growth was negative in 2020, in the last few decades nationally. But it has improved in 2021, so that growth has become positive. This means that electricity consumption in 2021 has recovered and exceeded 2019 before the COVID-19 pandemic (PT PLN (Persero) 2022).

Listrik yang Dibangkitkan dan Didistribusikan di Indonesia (GWh), 2018–2022

Electricity Generated and Electricity Distributed (GWh), 2018–2022

Pada masa pemulihan COVID-19 (2022*), jumlah listrik yang dibangkitkan mencapai **319.686,40 GWh**, dengan **85,63%** didistribusikan keseluruhan wilayah Indonesia.

During the COVID-19 recovery period (2022*), the amount of electricity generated reached 319,686.40 GWh, with 85.63% distributed throughout Indonesia.

⚡ Listrik yang didistribusikan ke pelanggan sebesar **273.761,48 GWh**, naik dibandingkan dengan tahun **6,3%** 2021.

Electricity distributed to customers totalled 273,761.48 GWh, increased by 6.3% compared to 2021.

⚡ **97,73%** rumah tangga di Indonesia pada 2022 telah menggunakan listrik PLN sebagai sumber penerangan utama.

In 2022, 97.73% of households in Indonesia used PLN electricity as their main source of lighting.

Pada 2022*, **69,02%** listrik yang dibangkitkan di Indonesia didistribusikan ke Pulau Jawa. Selain itu, Pulau Jawa juga menyumbang listrik sebesar **68,96%** dari total listrik yang dibangkitkan.

In 2022, 69,02% of the electricity generated in Indonesia was distributed to Jawa Island. On the other hand, Jawa Island also contributed 68,96% of the total electricity generated.*

5 provinsi dengan jumlah listrik yang didistribusikan tertinggi ada di Pulau Jawa

The 5 provinces with the highest amount of electricity distributed were on the Jawa island

Jawa Barat
20,54%

dari total listrik yang didistribusikan di Indonesia
of the total electricity distributed in Indonesia

KEADAAN GAS ALAM

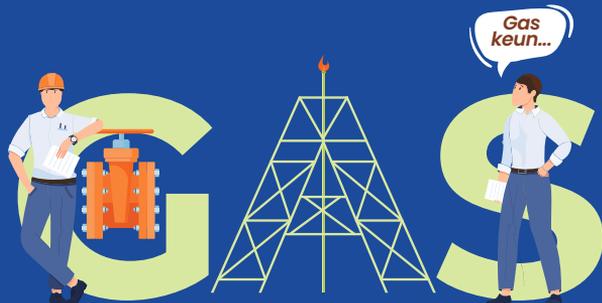

di Indonesia

The State of Natural Gas in Indonesia

Produksi gas alam mengalami tren penurunan dalam beberapa tahun terakhir. Beberapa lapangan gas besar di Indonesia, seperti yang berada di **Blok Mahakam**, sudah mencapai puncak produksinya dan kini mengalami penurunan.

Natural gas production has experienced a downward trend in recent years. Several large gas fields in Indonesia, such as those in the Mahakam Block, have reached peak production and are now experiencing a decline.

Produksi Gas Alam (MMSCF), 2018–2022

Production of Natural Gas (MMSCF), 2018–2022

Volume penjualan gas alam ke pelanggan melalui saluran pipa pada tahun 2022* sebesar 368.906,39 MMSCF, naik sebesar **5,17%** dibandingkan dengan volume penjualan tahun 2021.

The volume of natural gas sold to customers through Pipeline in 2022* was 368,906.39 MMSCF, up 5.17% from 2021.

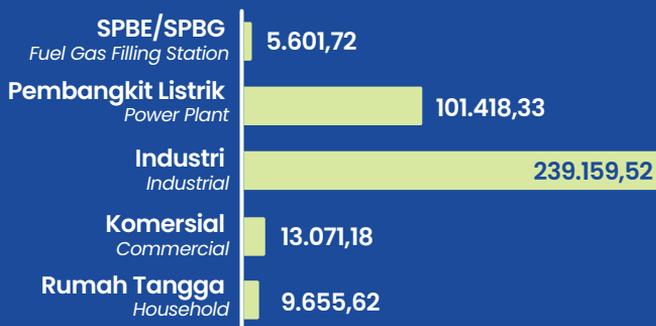

Pelanggan industri

menggunakan gas alam paling banyak dibandingkan dengan kelompok pelanggan lainnya.

Industrial customers used the most natural gas compared to other customer groups.

Volume Penjualan Gas Alam melalui Saluran Pipa Menurut Jenis Pelanggan (MMSCF), 2022*

Volume of Natural Gas Sold through Pipeline by Type of Customers (MMSCF), 2022*

Meskipun dari sisi volume tidak menyerap banyak, namun dari sisi jumlah pelanggan, kelompok pelanggan rumah tangga mendominasi, yakni **91%** dari total pelanggan.

Although in terms of volume it did not absorb much, in terms of the number of customers, the household customer group dominated, namely 91% of the total customers.

Catatan/Note: – *Angka sementara/Preliminary figures
– MMSCF = Million Standard Cubic Feet/Juta Standar Kaki Kubik per Hari

NILAI KONSTRUKSI YANG DISELESAIKAN PERUSAHAAN KONSTRUKSI DI INDONESIA

VALUE OF CONSTRUCTION COMPLETED BY CONSTRUCTION COMPANIES IN INDONESIA

2022

Aktivitas konstruksi mulai menggeliat setelah COVID-19 pada 2020 dan 2021.

Construction activity began to grow after the COVID-19 in 2020 and 2021.

Sepanjang 2022*, nilai konstruksi yang diselesaikan oleh perusahaan konstruksi berbadan usaha di Indonesia mencapai

▲ 1,52 kuadriliun rupiah,

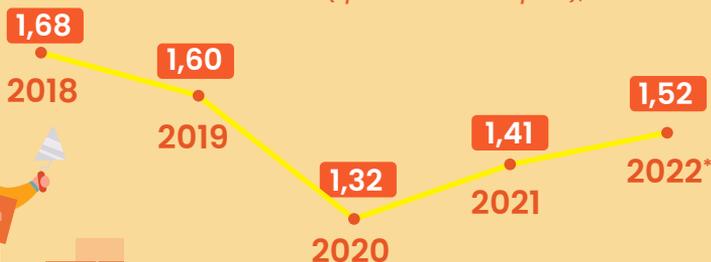

bertambah 118,61 triliun rupiah dibanding 2021.

In 2022, the total value of construction projects completed by companies in Indonesia amounted to 1.52 quadrillion rupiahs, marking an increase of 118.61 trillion rupiahs compared to 2021.*

Perkembangan Nilai Konstruksi yang Diselesaikan Perusahaan Konstruksi Berbadan Usaha (kuadriliun rupiah), 2018-2022

Development of the Value of Construction Works Completed by Construction Establishments (quadrillions of rupiah), 2018-2022

Konstruksi bangunan sipil masih menjadi tulang punggung proyek konstruksi nasional, mengambil porsi 57,23% dari nilai konstruksi seluruhnya.

Civil engineering became the bedrock of national construction project, accounting for 57.23% of the total construction value.

Tenaga kerja yang diserap sektor konstruksi salah satunya berkaitan erat dengan besaran nilai proyek.

Semakin besar nilai proyek, semakin banyak penyerapan tenaga konstruksi.

The demand for construction workers remains closely tied to the value of construction projects. Higher project values typically lead to greater employment in the construction sector.

Hubungan Nilai Konstruksi dengan Jumlah Pekerja Konstruksi di Indonesia

Relationship between Construction Value and Number of Construction Workers in Indonesia

2022*

DKI JAKARTA

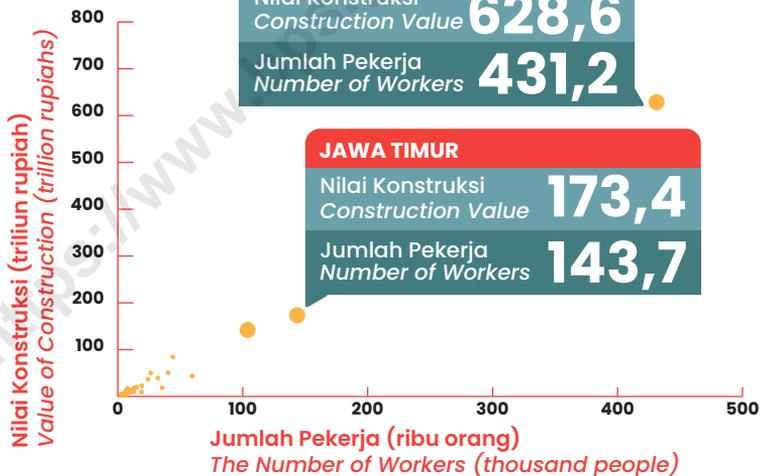

Nilai Konstruksi
Construction Value **628,6**

43

2021

2.154.045

2022

5.248.113

2023*

Peningkatan kunjungan ke Bali disebabkan oleh telah dibukanya kembali Bandara Ngurah Rai untuk penerbangan luar negeri per tanggal 7 Maret 2022. Selama 2022 dan 2023 terdapat beberapa events, baik yang berskala internasional maupun festival domestik di Indonesia yang menarik kunjungan wisatawan, termasuk wisatawan mancanegara. Event yang terkenal tahun 2023 antara lain, Bali spirit festival (peserta 60 negara); Bali trail running (peserta 194 WNA) pada bulan Mei 2023; Bali and beyond travel fair (15-17 Juni); Jatiluwih festival (16-18 Juni); Pesta Kesenian Bali (18 Juni); Bhineka Pantai Jerman culture festival (23-25 Juni); Bali international festival (Balinale) tanggal 1-4 Juni, dan lain-lain (BPS 2024a, 7).

The increase in arrivals to Bali was caused by the reopening of Ngurah Rai Airport for overseas flights as of March 7, 2022. During 2022 and 2023 there were several events, both international and domestic festivals in Indonesia that attracted visitors, including international visitors. The famous events in 2023 were the Bali spirit festival (participating 60 countries); the Bali trail running (participating 194 WNA) in May 2023; Bali and beyond travel fair (15-17 June); Jatiluwih festival (16-18 June); Bali Art Festival (18 June); Bhineka Beach German culture festival (23-25 June); Bali international festival (Balinale) on 1-4 June, and others (BPS-Statistics Indonesia 2024a, 7).

1,95 juta kunjungan

In 2023*, Soekarno-Hatta Airport was again the second most visited entry point after Ngurah Rai for international visitors, with 1.95 million arrivals.

Kedatangan Wisatawan Mancanegara Menurut 3 Pintu Masuk Utama (kunjungan), 2023*

International Visitor Arrivals by 3 Major Port of Entry (arrivals), 2023*

Departures

Jumlah kunjungan meningkat drastis **2 kali lipat** dibandingkan tahun 2022

Number of arrivals increased drastically, 2 times compared to 2022

LIVE REPORT

Peningkatan jumlah kunjungan wisatawan mancanegara yang masuk melalui Bandara Soekarno-Hatta disebabkan adanya rute baru (Vietjet airline SGN-CGK, IndiGo BOM-CGK dan Batik Air CGK-PER) pada bulan Agustus 2023 serta adanya event internasional yang diselenggarakan di Jakarta. Event internasional yang diselenggarakan antara lain, Kejuaraan FIBA Piala Dunia 2023 (25 Agustus-10 September 2023) yang diikuti oleh 32 negara; konser TXT; The 90s Festival 2023; Pameran di Museum Macan; Soundfest; Asian Sound Syndicate; Scarlett X EXO Glow to You dan lain sebagainya (BPS 2024a, 8).

The increase in the number of visits by international visitors entering through Soekarno-Hatta Airport was due to the existence of new routes (Vietjet airline SGN-CGK, IndiGo BOM-CGK and Batik Air CGK-PER) in August 2023 as well as international events held in Jakarta. Several international events held were the FIBA World Cup 2023 Championship (25 August-10 September 2023) followed by 32 countries; TXT concerts; The 90s Festival 2023; Exhibition at the Macan Museum; Soundfest; Asian Sound Syndicate; Scarlett X EXO Glow to You and so on (BPS-Statistics Indonesia 2024a, 8).

BREAKING NEWS

WISATAWAN KE JAKARTA
Tourist Visits to Jakarta

MEMBAIKNYA SITUASI COVID-19

MENDORONG PERUBAHAN POLA PENGELUARAN WISATAWAN MANCANEGERA

The Improvement in the COVID-19 Situation Has Prompted Changes in the Spending Pattern of International Visitors

Berkurang

53,25%

dibandingkan tahun 2021

Decreased by 53.25% compared to 2021

Pada **2022**, seorang wisatawan mancanegara rata-rata mengeluarkan biaya sebesar **USD 1.448,01** setiap berkunjung ke Indonesia.

In 2022, an international visitor spent an average of USD 1,448.01 per visit to Indonesia.

Disebabkan oleh **kebijakan pemulihan COVID-19** yang menghapus biaya-biaya terkait kesehatan, seperti biaya karantina, berbagai tes COVID-19, dan asuransi sehingga **menurunkan biaya** yang harus dikeluarkan wisatawan mancanegara. Hal ini terlihat dari **berkurangnya komposisi pengeluaran** kesehatan wisatawan mancanegara di tahun 2022 (BPS 2024f, xxii).

Caused by the COVID-19 recovery policy, which eliminates health-related costs, such as quarantine costs, various COVID-19 tests, and insurance, reduced costs to be incurred by international visitors. This can be seen from the reduced composition of international visitors' health expenditures in 2022 (BPS-Statistics Indonesia 2024f, xxii).

KOMPOSISI PENGELUARAN WISMAN MENURUT JENIS PENGELUARAN, 2021 DAN 2022

Composition of International Visitors Expenditure by Type of Expenditure, 2021 and 2022

2021		2022
41,72%	Akomodasi/Accommodation	40,23% 1,49 poin
16,86%	Makan Minum/Food & Beverage	21,94% 5,08 poin
10,02%	Penerbangan Domestik & Transportasi Lokal Domestic Flight & Local Transportation	11,14% 1,12 poin
17,27%	Belanja, Hiburan, & Cenderamata Shopping, Entertainment, & Souvenir	18,3% 1,03 poin
7,48%	Kesehatan/Health	0,46% 7,02 poin
6,66%	Kecantikan, Pelatihan, Paket Tur, Tamasya & Lainnya Beauty, Training Cost, Tour Guide, Sightseeing, & Others	7,93% 1,27 poin

Wisatawan mancanegara paling banyak mengeluarkan biaya untuk keperluan **akomodasi, makan minum, dan belanja.**

International visitors spent the most on accommodation, food and beverages, and also shopping.

JUMLAH KEBERANGKATAN PENUMPANG PESAWAT

THE NUMBER OF AIRCRAFT
PASSENGER DEPARTURES

2019-2023

Tahun **2022 dan 2023** merupakan tahun pemulihan lalu lintas penerbangan di **Indonesia** setelah dihantam pandemi COVID-19 pada tahun 2020 dan 2021.

Aircraft traffic in Indonesia began its recovery in 2022 and 2023 following the severe impact of the COVID-19 pandemic in 2020 and 2021.

Namun, jumlah keberangkatan **penumpang pada 2023 belum sebanyak sebelum Pandemi** COVID-19, baik penerbangan dalam negeri (domestik) maupun internasional. Sekitar **4/5** dari jumlah keberangkatan penumpang pada 2019.

However, passenger departures in 2023, both domestic and international, remained below pre-pandemic levels. Approximately four-fifths of the total number of passenger departures in 2019.

Catatan/Note: *Angka sementara/Preliminary figures

Jumlah Keberangkatan Penumpang Penerbangan Domestik di Lima Bandar Udara Utama

The Number of Domestic Flight Passenger Departures at Five Main Airports

2023

Aktivitas penerbangan domestik terus meningkat di tahun 2023.

Setelah mengalami pandemi COVID-19 pada tahun 2020 dan 2021, sektor transportasi udara mengalami pemulihan pada tahun 2022, seiring dengan peraturan pemerintah yang mengaktifkan kembali penerbangan di beberapa bandar udara.

Domestic flight activity saw consistent growth in 2023. After the impact of the COVID-19 pandemic in 2020 and 2021, the air transportation sector began recovering in 2022 as government regulations allowed the resumption of flights at several airports.

ADAPTASI TEKNOLOGI INFORMASI DAN KOMUNIKASI (TIK) DALAM MASA PEMULIHAN COVID-19

Information and Communication Technology (ICT) Adaptation During the COVID-19 Recovery Period

Pandemi COVID-19 mendorong pemanfaatan TIK yang semakin luas dalam masyarakat. Dalam rangka pencegahan penyebaran COVID-19, kebijakan tetap di rumah dan berbagai pembatasan aktivitas tetap muka diberlakukan. Di sisi lain, kebutuhan untuk berkomunikasi dan mengakses berbagai informasi semakin tinggi. Hal ini membuat kebutuhan akan teknologi informasi dan komunikasi semakin tak terelakkan (BPS 2023, xl).

The COVID-19 pandemic accelerated the adoption of ICT across society. Restrictions on in-person activities and stay-at-home measures, implemented to curb the spread of the virus, heightened the need for communication and access to information, making ICT an essential tool (BPS-Statistics Indonesia 2023, xlii).

Pada 2023 / In 2023

Masyarakat cenderung semakin banyak yang menggunakan komputer dan/atau mengakses internet. **Di sisi lain, kepemilikan telepon tetap kabel mengalami penurunan.**

More people relied on computers and the internet, while ownership of fixed-line telephones declined.

Hanya **1 dari 100** rumah tangga di Indonesia yang memiliki/menguasai telpon tetap kabel.

Only 1 in 100 households in Indonesia had a fixed-line telephone.

Penetrasi internet di Indonesia relatif tinggi.

Internet penetration in Indonesia notably relatively high.

✓ **7 dari 10** penduduk Indonesia usia 5 tahun ke atas pernah mengakses internet dalam 3 bulan terakhir.

7 out of 10 individuals aged 5 and above accessing the internet in the past three months.

✓ **5-6 kali** masyarakat Indonesia menggunakan internet untuk mengakses bahan informasi per minggu.

On average, people accessed online information materials 5 to 6 times per week.

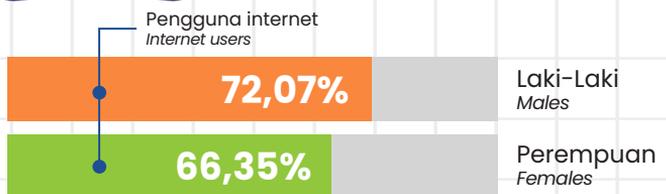

✓ **1 jam 57 menit** durasi masyarakat Indonesia mengakses internet perhari.

On average, people accessed the internet for 1 hour 57 minutes per day.

Pengguna internet laki-laki lebih tinggi dibandingkan perempuan

Male internet users were higher than female ones

12,30% penduduk Indonesia usia 5 tahun ke atas di Indonesia menggunakan komputer
Population aged 5 and above used computer

Naik **1,32% poin** dibanding 2022
increased compared to 2022

Penerimaan Sinyal Internet Telepon Seluler pada Masa Pandemi COVID-19

Cellular Phone Internet Signal Reception during the COVID-19 Pandemic

96,14%

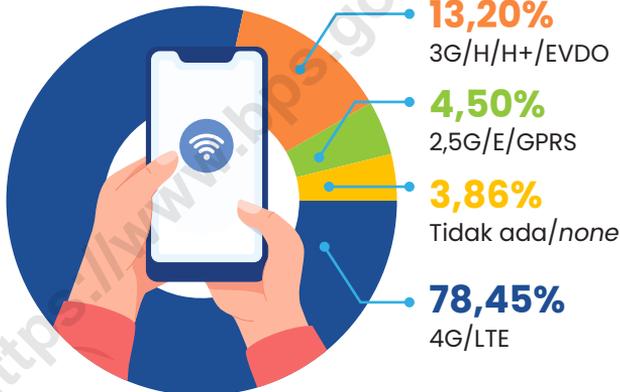

desa¹/kelurahan di Indonesia sudah menerima sinyal internet telepon seluler pada 2021.

In 2021, 96.14% of villages¹/kelurahan in Indonesia had access to cellular phone internet signals.

Persentase Desa¹/Kelurahan Menurut Penerimaan Sinyal Internet Telepon Seluler, 2021

Percentage of Villages¹/Kelurahan by Cellular Phone Internet Signal Reception, 2021

Teknologi 2/2,5G masih dipertahankan di Indonesia karena merupakan jaringan dasar untuk melakukan telekomunikasi. Khususnya di daerah pedalaman, teknologi ini dianggap paling stabil. Sementara itu, secara bertahap sejak tahun 2020, operator jaringan seluler mulai menonaktifkan teknologi 3G. Adapun teknologi 4G saat ini menjadi jaringan utama telekomunikasi seluler dan juga internet. Sedangkan untuk 5G yang merupakan teknologi baru, kini mulai digunakan di Indonesia (BPS 2023, 16).

Indonesia continues to maintain 2/2,5G technology as the foundation of its telecommunications network, particularly in rural areas where it is the most reliable. Since 2020, mobile network operators have gradually phased out 3G technology. Currently, 4G serves as the primary network for mobile telecommunications and internet services, while the newer 5G technology is gradually being introduced (BPS-Statistics Indonesia 2023, 68).

Penyebaran sinyal internet telepon seluler belum merata

Cellular phone internet signal was not evenly distributed

Seluruh desa¹/kelurahan di Provinsi **Kepulauan Bangka Belitung dan Bali** sudah menerima sinyal internet telepon seluler.

All villages¹/kelurahan in Kepulauan Bangka Belitung and Bali Province had received cellular telephone internet signals.

Sedangkan di **Provinsi Papua** 4 dari 10 desa¹/kelurahan tidak ada sinyal internet telepon seluler.

However, in Papua Province, 4 out of 10 villages/kelurahan still lacked cellular phone internet connectivity.

Catatan/Note: ¹Desa pada tabel ini termasuk nagari di Provinsi Sumatera Barat dan Unit Pemukiman Transmigrasi (UPT) yang masih dibina oleh kementerian terkait/Villages in this table includes nagari in Sumatera Barat Province and Transmigration Resettlement Unit under related ministry

KONDISI PERFILMAN INDONESIA PADA MASA PANDEMI COVID-19

The State of Indonesian Cinema During the COVID-19 Pandemic

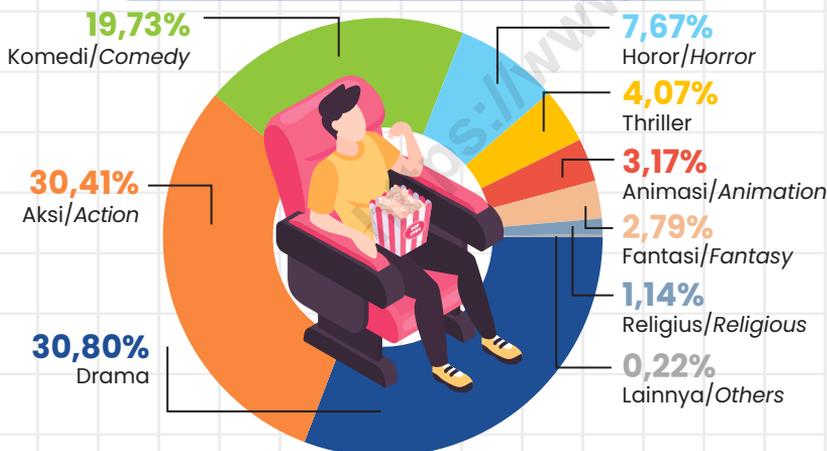

Pandemi COVID-19 berimbas pada hampir semua sektor, tidak terkecuali bioskop dan industri kreatif perfilman. Pada tahun 2020, pemerintah memberlakukan Pembatasan Sosial Berskala Besar (PSBB) dan dilanjutkan tahun 2021 Pemberlakuan Pembatasan Kegiatan Masyarakat (PPKM), yang mana berimbas pada aktivitas bioskop dan berbagai tempat hiburan yang sempat tutup kemudian dibuka kembali dengan kapasitas pengunjung yang dibatasi.

The COVID-19 pandemic significantly impacted various sectors, including cinemas and the creative film industry. In 2020, the government imposed Large-Scale Social Restrictions (PSBB), followed by the Implementation of Community Activity Restrictions (PPKM) in 2021. These measures led to the temporary closure of cinemas and entertainment venues, which later reopened with restricted visitor capacity.

Kesejahteraan Petani 2023

Farmer Welfare

Kesejahteraan petani Indonesia **cenderung membaik** dengan meningkatnya Nilai Tukar petani (NTP) dalam 4 tahun terakhir, dari 2020 hingga 2023.

The welfare of Indonesian farmers has generally improved, as reflected by the rise in the Farmers' Terms of Trade (FTT) over the past four years, from 2020 to 2023.

Indeks harga yang diterima petani: **131,59** naik **9,05%**
Price received by farmers indices: *naik increased by*

Indeks harga yang dibayar petani: **117,01** naik **4,07%**
Price paid by farmers indices: *naik increased by*

Kenaikan harga yang diterima petani **lebih besar** daripada harga yang dibayarkan petani untuk keperluan produksi.

The price increase received by farmers have exceeded the price paid by farmers for production purposes.

Namun, petani di provinsi **Bali, Nusa Tenggara Timur, dan Papua Barat¹** mengalami defisit dalam proses produksi hasil pertaniannya dengan NTP kurang dari 100.

Nevertheless, farmers in Bali, Nusa Tenggara Timur, and Papua Barat experienced a deficit in the agricultural product production, with an NTP of less than 100.

The only commodity that saw a decrease in average monthly per capita expenditure:

-13,59%

Pengeluaran sebulan setiap penduduk di DKI Jakarta hampir **3X lipat** dibandingkan penduduk Nusa Tenggara Timur.

Residents in DKI Jakarta spent, on average, three times more per month compared to those in Nusa Tenggara Timur.

DKI Jakarta

Rp **2.791.716**

Provinsi dengan rata-rata pengeluaran per kapita sebulan **paling besar**.

Provinces with the highest monthly average expenditure per capita.

Nusa Tenggara Timur

Rp **961.372**

Provinsi dengan rata-rata pengeluaran per kapita sebulan **paling kecil**.

Provinces with the lowest monthly average expenditure per capita.

KETAHANAN PANGAN

di Indonesia

Belum Merata

Indonesia's food security was not evenly distributed

Pangsa Pengeluaran Pangan

Maret 2023 **48,99%**

turun 2,29% dibandingkan Maret 2022.

In March 2023, the share of food expenditure was 48.99%, showing a 2.29% decrease compared to March 2022.

- Pangsa pengeluaran pangan dapat menjadi salah satu indikator kesejahteraan rakyat dengan mengukur tingkat ketahanan pangannya.
- Semakin rendah pangsa pengeluaran pangan mengindikasikan ketahanan pangan yang semakin meningkat (BPS 2023b, 12).

The proportion of food expenditure serves as an indicator of people's welfare by assessing food security levels. Generally, a lower share of food expenditure reflects higher food security (BPS-Statistics Indonesia 2023b, 12).

Pangsa Pengeluaran Pangan Menurut Golongan Pengeluaran per Kapita Sebulan (%), Maret 2023

The Share of Food Expenditure by Class of Monthly Expenditure per Capita (%), March 2023

“ Hanya Golongan pengeluaran per kapita sebulan >Rp1.500.000 yang memiliki pangsa pengeluaran pangan <50 persen. ”

Only households with a monthly per capita expenditure greater than IDR 1,500,000 had a food expenditure share below 50 per cent.

Pangsa pengeluaran pangan adalah persentase pengeluaran untuk komoditas makanan terhadap total pengeluaran secara keseluruhan (BPS 2023b, 9).

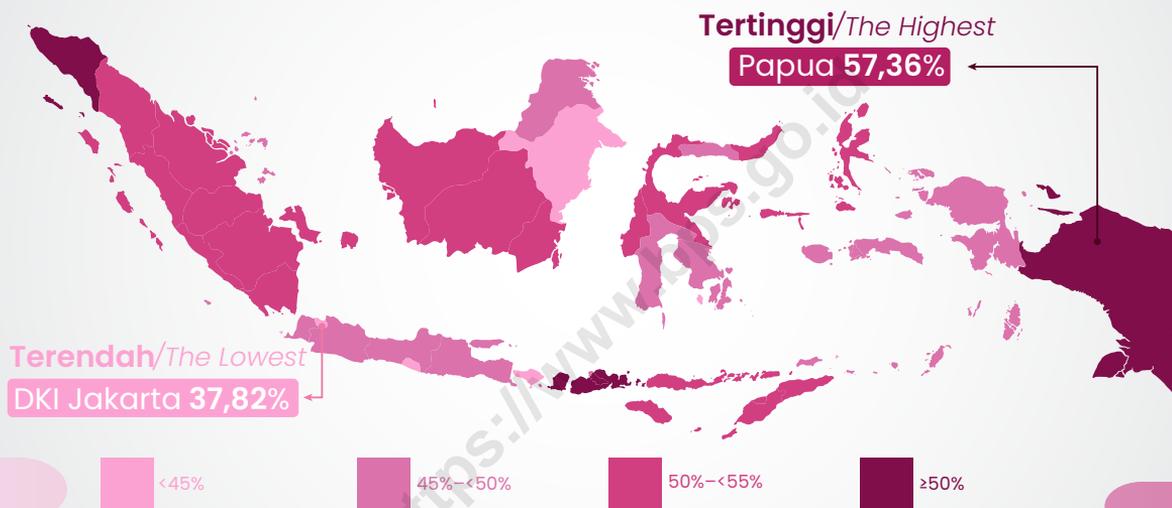

The share of food expenditure refers to the percentage of total spending allocated to food commodities (BPS-Statistics Indonesia 2023b, 9)

15 provinsi memiliki pangsa pengeluaran pangan kurang dari 50%

Fifteen provinces recorded food expenditure shares below 50%
